

An Appeal to Research Scholars and Their Guides

University Mission

One of the major mission of JSS Science & Technology University being to nurture research culture that enables innovations to flourish, advancement of creative ideas, foster interdisciplinary collaboration with in the university and their respective stake holders. University intend to create a vibrant research environment in campus wherein, young student population with vivid ideas will be linked with experience faculty. They together linked with like-minded yet diversely skilled and/or professional people from industry and academic alike. This is to cherish a vibrant and viable innovations culture essential to resolve academic research challenges and providing solutions to real time problems by innovative technologies. This is a source of pride for the JSS-S&T University.

An appraisal

I congratulate all the research scholars and their guide for maintaining the schedule of time for submission of synopsis in prescribed format. I wish to inform that Mr. M.S.Maheshan (Guide: Dr. Harish) from Engineering faculty, Smt. S,M.Anushree (Guide: Dr.P. Nagesh) from MBA and Smt.S.Shruthi (Guide: Dr.Siddaramaiah) from science faculty are the first to submit synopsis from their respective faculty. I am pleased to inform Mr. Maheshan is also first to complete pre-registration viva-voce. Among the Synopsis submitted Smt Varsha (Guide: Dr.S.P.Shivaprakash) from computer Science department adjudged as the best synopsis in terms of research proposal and its expected output. Mr.Santosh (Guide; Dr.Umesh) proposed to work on distinct research problem i.e. forecasting an appropriate alternate crop for agriculture food crops which is a real time national problem. Our appreciation to all the concern research scholars and faculty for their sincere efforts.

Annotations on Synopsis Submitted

Innovations of newer processes and novel technologies are the finite achievements of engineering research. In this regard it is disappointment to note that serious efforts were not visible either to identify the real time problems or towards product development in the majority of the synopsis submitted hitherto. University wish that more efforts need to be made by the faculty and research scholars for reorientation of research work towards advanced or contemporary research activities and/or amelioration of the research work towards development of innovative technology or product. This is essential to achieve

better output in research pursuit concern. Inter or multidisciplinary research planning between the departments, increase in partnerships with universities, national laboratories, and industry needed to be pursued seriously in this regard. We strongly believe that the research scholars and faculty will contribute to the standards and expectation of JSS S&T University.

We wish students, research scholars and faculty to join hands and to be partners to create vibrant and viable innovations culture in the university.

Dean-Research

Note: Synopsis may kindly be modified or reorient towards better output and submit on or before pre-registration Viva-voce examination.
